Digital Audit Event

25th of September 2019

Courtyard Zürich North

How will the audit function look like tomorrow? Would intelligent robot assistants be able to constantly monitor risks, or will auditors use virtual reality to visit remote locations? In an ever more changing environment, it is important that audit becomes agile and adapts quickly to stay relevant to the new risks emerging from an increasingly digital world.

To that, join us again this year in Zurich, at Courtyard Oerlikon Hotel to learn how audit leaders drive innovation through leading digital technologies and leverage analytics to optimize audit processes, improve assurance and transform the audit function.

We are looking forward to presentations from Roche, Bayer, ABB, Credit Suisse, Microsoft and Nestle followed by a panel discussion for questions.
